25.0	1						
19.0	3/4						
12.5	1/2						
9.5	3/8						
(H) = Sum of (A)					I = Sum of (G)		
					*Weighted Average = $\frac{I}{H}$		

If the sieve has < 10% retained, do not test it. Use the value for the next size larger or smaller that has ³ 10% retained.

If both a larger and smaller size have ³ 10% retained, use the average.
